

We've Got You Covered

If the phone lines are cut, the alarm signal can't get

You've made the right choice in installing a security system to protect your business. You can make sure that the most reliable technology is protecting your investment.

Depend On Us

A commercial security system protects your employees from harm and keeps your investment secure. In a fire or burglary emergency, the system gets you the help you need by seizing the phone line and dialing the central station.

However, if the phone lines are intentionally cut, how will the alarm signal get through? That's when AlarmNet's got you covered.

through. That's when AlarmNet's got you covered.

A Leader in Communication Technology

Honeywell's AlarmNet has been the nationwide leader in alarm communications technology since 1986.

Our commercial burglary services and product lines are a reliable alternative for the transmission of alarm signals.

A Variety of Choices

You can choose Control Channel Cellular or the Internet to deliver the alarm signal from your facility.

Cellular Tower

- **Control Channel Cellular** technology is extremely reliable and offers virtually limitless coverage.
- Our **Internet** service uses 1,024 bit encryption to provide the absolute best in data security.

AlarmNet Products

Offering extensive coverage, our system meets UL High Line Security requirements for jewelry stores and banks.

Our wide range of products are a reliable solution for the transmission of alarm signals.

A Path of Protection

No matter what technology you choose, all alarm signals are processed through AlarmNet's Network Control Center. Supervised 24 hours a day, the Control Center sends your signal to the central station to protect your business 365 days of the year.

Don't leave your facility vulnerable. Trust AlarmNet with your security protection needs. By working together, we can create a system that keeps your investment secure and profitable.
