

Total Connect Services

SECURITY, PRODUCTIVITY AND CONNECTIVITY

**Stay Connected to
Your Business...**

Honeywell

...Wherever You Are!

Count on Total Connect Services for a Direct Link to Your Business...All Day, Every Day.

A Vital Link

In today's digital era, it's vital for you to stay connected to your business to remain competitive. Ideal for the busy, mobile professional, Honeywell's state-of-the-art Total Connect digital solutions keep you in the know and arm you with the critical information you need instantly—providing you with direct access to your company all day, every day and giving you the protection and peace of mind you deserve. It's never been a better time to get connected!

Choose from Basic or Enhanced Services

- Control your security system via a virtual keypad using any web browser on a PC or via SMS on a cell phone
- Receive important alerts through any text messaging device, including cell phones and PDAs (e.g. an employee entering a restricted area)
- Receive e-mail notification regarding activity in various areas of your business to ensure safety or prevent unauthorized access (e.g. learn when gas and water valves have been turned on or off or if a door has been propped open)
- Do even more with Total Connect's enhanced services! With optional video, you can view activity occurring around the exterior or interior of your business (e.g. monitor employee performance, guard against theft or criminal activity, keep an eye on vulnerable areas like file rooms or loading docks) from the office, at home or any remote location over a PDA, the Internet—even your cell phone!

How it works

Whether you're in the office or on the road, Total Connect lets you take advantage of all of the amazing benefits next-generation digital technology can provide. You can now use the Internet, PDAs, cell phones and other web-enabled devices to control your security

system, receive information remotely and much more. And our Video Services option allows you to keep an eye on your business, your assets and your employees from any remote location with Internet access!

Total Connect actually simplifies and streamlines the way you interact with your business on a day-to-day basis—helping you operate a safer and more productive enterprise by intelligently utilizing everything today's technology has to offer.

Communications Solutions

for Every Business

Total Freedom

As director of operations for a regional supermarket chain, I need to be able to connect and communicate with my business whether I'm on-site or on the go. With Total Connect, I have total freedom! I can go online wherever I am to check that things are running smoothly. More importantly, with so much perishable inventory, I can get instant notification if our refrigeration systems malfunction. Imagine the loss of revenue from spoiled foods, or the liability if customers became ill from foods stored at incorrect temperatures.

Minding the Store

I'm an area manager for a chain of trendy clothing stores located in high-traffic malls. Like many retail environments, employee turnover is high. With that comes the continual need to reassign who has access to the security system. With Total Connect, I can easily get online to assign security codes to allow access as well as cancel codes for ex-employees. I can control the systems of all the stores in my area through the Total Connect website 24/7. It's great to always be connected!

Stay Connected...and Protected

I'm the security manager for a large commercial property management company that covers over 100 properties in two counties. Even though I know my central station is on top of things, I also like to be in the know. With Total Connect, I can have instant notification if there is a situation at any one of those properties. I recently received an e-mail notifying me that a significant temperature drop occurred in one of the buildings. That meant that if a pipe were to freeze it could cause damage as well as disrupt business! Because of Total Connect, I was alerted to the situation instantly and could take action to have it repaired right away. With immediate access to information, I can better protect my business, my properties and my employees and create a safer work environment.

Connect to Opportunity

My brother and I have been in the electronics business for many years. Our higher ticket items are in a special area of our warehouse that very few people can access. Total Connect helps us keep an eye on our business when we're not around, which usually means ensuring that things are safe and secure. However, Total Connect recently helped us in a way we would never have imagined—functioning as a collaborative tool that actually helped us gain business.

My brother and I were offsite when we got a call from our office manager. A customer whose business we've been trying to get for a long time had called and wanted to place a large order and needed it shipped overnight. However, no one on premises had access to the restricted area where the items were stored. I immediately logged on to Total Connect and assigned a user code to the office manager so she could supervise the fulfillment of this very important order. Thanks to Total Connect, we were able to satisfy a new client and secure a great new business opportunity!
